📍 Bengaluru, India 560079

PROFESSIONAL SUMMARY

Detail-oriented IT professional with hands-on knowledge in Linux system administration, AWS cloud fundamentals, troubleshooting, and infrastructure management. Seeking an entry-level opportunity in Linux Administration, Cloud Support, or AWS Operations to apply technical skills in real-time IT environments.

EDUCATION

10th Standard: CBSE, 05/2015

MES English School - Bengaluru

CGPA: 6.6

Diploma: Electrical & Electronics Engineering, 05/2019

RES Polytechnic - Bengaluru

Percentage: 65%

Bachelor of Engineering (B.E): Artificial Intelligence & Machine Learning, 05/2025

RNS Institute of Technology - Bengaluru

CGPA: 8.4

EXPERIENCE

Linux & AWS Intern, IT Skill Nest

Bengaluru, July 2025 - December 2025

- Administered Linux servers including user and group management, file permissions, SSH hardening, and sudo access control
- Installed, configured, and managed Apache HTTP Server on Linux systems
- Deployed and managed AWS EC2 instances using secure AMIs, key pairs, and IAM roles
- Configured EBS volumes, mounting, and persistent storage using /etc/fstab
- Created and managed S3 buckets with versioning, lifecycle policies, encryption, and access control
- Implemented Application Load Balancer and integrated it with EC2 instances for high availability
- Configured Auto Scaling Groups to handle variable workloads
- Monitored infrastructure performance and availability using CloudWatch metrics, logs, and alarms
- Automated routine administrative tasks using Bash scripts (user creation, backup automation, log cleanup)
- Scheduled cron jobs for system maintenance and health monitoring
- Assisted in troubleshooting Linux, networking, and AWS infrastructure issues
- Followed best practices for security, least-privilege IAM policies, and cost optimization

Assistant Engineer, Micron Electricals

Bengaluru, December 2021 - January 2023

- Managed engineering project execution, documentation, and daily workflow coordination.
 - Analyzed resource and process data to improve operational efficiency.
 - Resolved technical and operational issues through structured problem-solving.
 - Improved reporting accuracy through systematic documentation practices.
 - Developed strong teamwork and communication skills applicable to IT operations.
-

SKILLS

- **Linux Administration** : Linux Installation & Configuration, User & Group Management, File System & Partition Management, Permissions, Ownership, ACL, Process & Service Management (systemd), Log Management & System Monitoring, Cron Jobs & Basic Shell Scripting, Package Management (apt, yum)
 - **AWS Cloud (SAA Level)** : EC2 Instance Setup & Management, S3 Buckets, Versioning, Lifecycle Policies, IAM (Users, Groups, Roles, Policies), VPC (Subnets, Route Tables, Security Groups), EBS, Snapshots & Backup, CloudWatch Monitoring, AWS CLI Usage
 - **Networking** : OSI Model & TCP/IP, DNS, DHCP, NAT, Routing, Firewall & Security Groups, Subnetting & CIDR
-

CERTIFICATIONS

- Linux Administration (Training)
 - AWS SAA (Solutions Architect Associate) (Training)
-

LANGUAGES

- English
 - Kannada
 - Hindi
-

PROJECTS

Linux Administration Hands-on Practice

- Installed and configured Linux (Ubuntu/CentOS) for server environments.
- Performed user management, permission settings, filesystem management, ACL, and cron tasks.
- Managed system logs, services, processes, and implemented basic shell scripts.

AWS Cloud Practical Labs

- Launched EC2 instances, configured EBS volumes and snapshots.
- Set up S3 buckets, access permissions, lifecycle rules, and versioning.
- Created and managed IAM users, groups, MFA, and policies.
- Designed a basic VPC with subnets, routing, and security groups.

S3 Bucket Management & Static Website Hosting

- Configured S3 bucket with versioning and lifecycle rules for data protection and cost optimization.
- Hosted a static website using S3 and configured bucket policy for secure public access.
- Worked with object permissions, hosting endpoints, and static content deployment.

AWS VPC Setup Lab

- Designed a custom VPC with public and private subnets.
- Configured route tables, Internet Gateway (IGW) for public access, and NAT for private subnet internet routing.
- Tested cross-subnet connectivity and validated secure network segmentation.

AWS Cloud Practice Setup

- Implemented monitoring with CloudWatch.
 - Configured security groups, key management, and access controls through IAM and VPC.
 - Performed hands-on tasks using AWS CLI for automation and quick deployments.
-
